Abstract

This sample is a guideline for preparing technical papers using \LaTeX for manuscript submission. It contains the documentation for your \LaTeX Class file, which implements the layout for your manuscript for all Journals of OUP. This sample article uses a class file named `ouparticle.cls` that all authors need to use for their manuscript preparation. It is similar in use to the `article` class file of \LaTeX , but has some extra fields in the preamble and some extended commands for other parts of the article.

Keywords: word1; word2; word3; and word4
